Discover Launceston

WHERE NATURE, HERITAGE AND EXPERIENCE MEET

Launceston is one of Australia's most compelling regional destinations, where heritage, landscape and a globally recognised food culture come together.

Positioned on the banks of kanamaluka / the River Tamar and moments from Cataract Gorge, the city delivers a rare combination of striking natural beauty and a refined, walkable urban centre.

As a UNESCO City of Gastronomy, Launceston is defined by its connection to produce, people and place – offering depth well beyond its size.

Launceston offers:

- A compact, connected city centre with venues, accommodation and dining in close reach

- A rich cultural landscape, on display at the Queen Victoria Museum & Art Gallery, and a strong year-round events calendar

CONNECTED AND EASY TO NAVIGATE

Launceston's scale enables seamless event delivery. Delegates move effortlessly between accommodation, venues and experiences, maintaining momentum across the program and maximising engagement.

BEYOND THE PROGRAM

In Launceston, the experience extends beyond the room.

From cellar door tastings and paddock-to-plate dining to gorge walks, heritage streetscapes and outdoor adventure, the region offers a breadth of experiences that encourage delegates to connect – with each other and with place. .

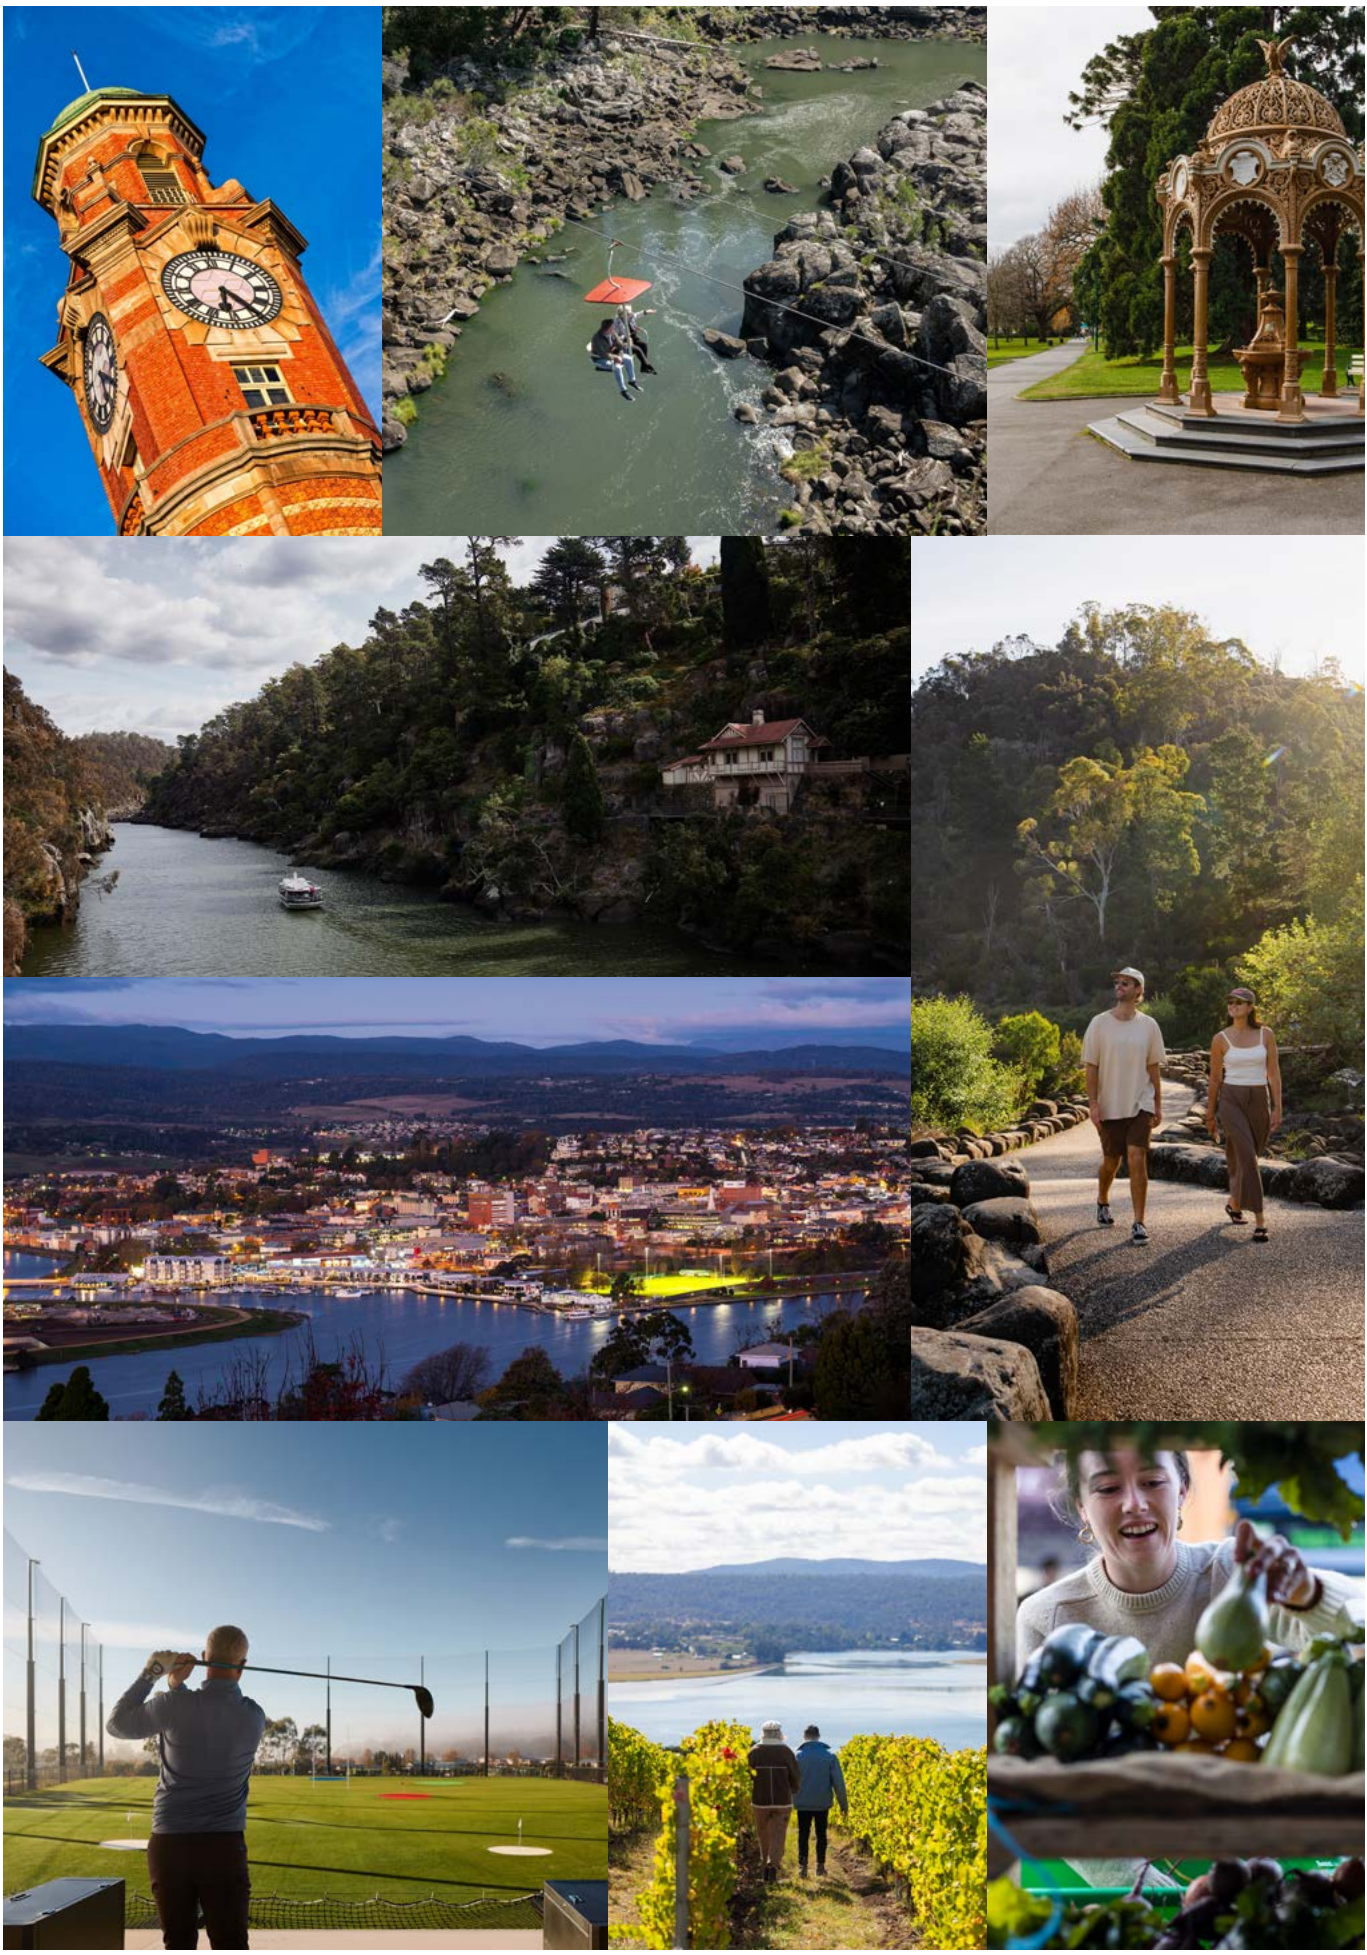

THE IDEAL BALANCE

Launceston delivers:

- Accessibility without congestion
- Natural beauty paired with established event infrastructure
- A genuine sense of escape, while remaining connected and easy to access

- Support local producers and build resilience in our communities;
- Improve energy efficiency and reduce overall energy use;
- Increase resource recovery and reduce waste to landfill;
- Reduce chemical usage where appropriate;
- Improve water efficiency and reduce overall water use.

We actively support our Sustainability Champions Group (SCG), made up of employees from Federal Hospitality properties across the state. The SCG is a forum for sharing information and ideas designed to further increase the Group's sustainability outcomes. The SCG disseminates information about sustainability projects underway across the Group and identifies potential initiatives worthy of further investigation and analysis.

We ensure procurement documentation includes appropriate provisions designed to encourage environmentally friendly outcomes, and our procurement practices support environmentally responsible suppliers.

Our employees are assisted to support in-house sustainability programs and model good practices in areas such as recycling. Employees are also encouraged to identify and nominate sustainability initiatives through to the SCG for assessment and investigation.

Working together to make smarter choices that improve sustainability across all operations
