Business Event Video & Photography Packages

We extend the value of your event ...and make you look good in the process.

As I'm sure you appreciate, video and photography are valuable, powerful mediums to tell your brand's story, to showcase your event and to engage with your target audience. We're talking about compelling, interesting and emotionally engaging content that can propel your brand forward.

Our responsibility is to transform your event from a moment in time, into a valuable, permanent asset to inspire and motivate your audience.

Video & Photography done right can make your event truly unforgettable. We do that by understanding your brand, your objectives and your audience. Then we decide the best approach that will resonate with your audience, whether it be stirring the imagination, inspiring trust or conveying information.

Whatever direction you need, we can help you communicate it clearly... and make you look good in the process.

There are a lot of moving parts in producing a compelling video but at The Bakery, our experience has taught us the most efficient and effective workflows, depending on your budget and expectations.

1. Pre-Production

Pre-production is the all important planning phase. It's basically a big questionnaire; What function will the video serve? What should it look & feel like? and, Who are the VIPs? Laying the right groundwork is essential to developing a great video.

2. Production

Now that we have the road map developed, it's time get shooting. This is where we pick up the cameras, lights and microphones and swing into action.

3. Post-Production

This is where our editorial team kicks in to shape your story, adjust mood with colour, record any voice overs, clean up audio, add music, create animated title graphics and in general make sure your video looks exactly like we planned in Pre-Production. It's at this stage that you'll see the first cut.

4. Final Revisions

Once you've seen the first cut, you'll have a chance to share your thoughts with us. We then refine the video with a second round of edits and move toward delivery.

5. Output

With the final cut complete and signed-off with your approval, we create high quality files of your video in whatever formats you need, be it for the web, trade shows or broadcast television.
